

Jackson Convis

Software Development Engineer

Royal Oak, MI | 248.500.6981 | jackconvis@gmail.com | [LinkedIn](#)

SUMMARY

Software Development Engineer with 3+ years of experience building and modernizing enterprise APIs and microservices. Experienced in C#, .NET, EF Core, Java, Spring Boot, Kafka, and third-party integrations. Proven track record of owning backend services, modernizing legacy systems, improving engineering quality and infrastructure efficiency, and delivering production functionality under aggressive deadlines.

PROFESSIONAL EXPERIENCE & PROJECTS

Software Development Engineer - United Wholesale Mortgage (Pontiac, MI) June 2024 - Present

- Own and maintain a Marketing Integration microservice supporting 6 external vendors and 38 RESTful API endpoints, serving as primary developer for MonitorBase and First Orion integrations.
- Led modernization of the Loan Fee service by migrating fee logic from Mediator to dedicated public APIs, eliminating redundant endpoints and fee-related code from Mediator and replacing the fees database dependency with a static C# implementation.
- Designed and delivered the first API integration between Mediator and the Loyalties platform, enabling broker eligibility verification for complimentary credit reports; delivered core MVP functionality within 2 days against a strict sub-two-week deadline.
- Improved mutation-test scores from approximately 40% to over 80% across Loan Events and Fees Services by removing code-coverage exclusions and improving testability.
- Led Azure Database optimization initiatives across Documents and Loan Events services, reducing infrastructure costs by thousands of dollars per month through database downsizing.

Associate Software Developer - United Wholesale Mortgage (Pontiac, MI) July 2023 - June 2024

- Selected to perform cross-functional QA validation for the public launch of UWM's GenAI platform, testing ChatUWM functionality outside normal engineering responsibilities.
- Designed C# fee-mapping and waiver strategies supporting 20+ fee types, improving flexibility for evolving business rules.
- Selected as Team Lead for a summer engineering cohort, guiding new software trainees through Agile practices and supporting development of an automated company-goals dashboard.

Languages & Frameworks

- C#, Java, SQL
- .NET, Spring, EF Core
- HTML & CSS

Backend & Infrastructure

- REST APIs, Microservices
- SQL Server, Terraform
- Kaka, Distributed Systems

Practices

- AI, Agentic Development
- Integration & Mutation Testing
- Git, Bitbucket

EDUCATION & CERTIFICATIONS

Full Stack Java Certificate - Grand Circus Coding Bootcamp (Detroit, MI) March 2022 - May 2023

Immersive, 7-month, software-engineering bootcamps

- Awarded the Amazon Java Developer Scholarship — Top 7% of applicants | 99% average across full-stack coding assessments
- **C# Developer - [Hackerrank](#)** 2025
